What is Liquid Seaweed Fertilizer?

A natural fertilizer made by extracting nutrients from marine seaweed (mainly kelp). It's rich in:

- **Micronutrients (iron, zinc, magnesium)**
- **Plant hormones (auxins, cytokinins, gibberellins)**
- **Amino acids and enzymes**

Key Benefits

- **Boosts seed germination**
- **Promotes strong root and shoot growth**
- **Increases flowering and fruiting**
- **Improves drought, frost, and pest resistance**
- **Safe for all crops – vegetables, fruits, seedlings, lawns, and flowers**

How to Use

Foliar Spray:

- Mix 50 ml in 20 liters of water
- Spray on leaves early morning or late evening (every 2 weeks)

Root Drench / Soil Application:

- Mix 50–100 ml in 10 liters of water
- Apply directly to the soil around plant roots

Seed Soaking:

- Soak seeds in diluted solution (20 ml per 10L) for 4–6 hours before planting
